RE: Davidson's Landing  
AK0000262097

Dear Mr. Komok:

Per our telephone conversation on May 10, 1996, this letter confirms the site visit at Davidson's Landing located approximately 32 miles east of Teller, Alaska on June 4, 1996. Please provide at this time, copies of sampling or monitoring information related to this site.

The visit will be performed by Ecology and Environment, Inc., (E & E). E & E is an authorized contractor of the U.S. Environmental Protection Agency (EPA) (Contract No. 68-W6-0008) and is acting as field investigators for the EPA. The investigators may be accompanied by representatives from the EPA, the Alaska Department of Environmental Conservation, or both.

Under Section 104(e) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), 42 U.S.C. 9604(e), the EPA may gain access to and request information from sites where:

- Any hazardous substances, pollutants, or contaminants may have been released or are threatened to be released, or
- Any hazardous substances, pollutants, or contaminants may have been generated, stored, treated, disposed of, or transported to or from the site.

Davidson's Landing will be visited to determine the impact or potential impact of any hazardous substances that have been, are, or may be released to the environment at or from the facility or that may have migrated to the facility from another facility. The field investigators may:

- Meet with the site owner or representatives.
- Interview the site owner or representative to confirm existing information (i.e., address, total area, etc.)
- Perform a site walk-through and visual inspection with the site owner or representative.

- Take photographs of the site.
- Collect all pertinent information including manifests, site maps, sampling results, etc., from the site owner or representative.

Findings will provide a basis for the EPA to determine whether any further action is appropriate at the site.

Mary's Igloo Native Corporation may assert a claim of confidentiality for any information entitled to protection under 40 CFR, Part 2, Subpart B. All confidential material must be separately submitted, marked "confidential," and include the basis of your claim. The EPA will treat such information as set forth in the cited subpart.

If you have any questions regarding our site visit, please contact me at (206) 624-9537 or Joanne LaBaw, at the EPA, (206) 553-2594. I will contact you approximately one week prior to our planned visit to re-confirm permission for site access and to talk further concerning site information.

Sincerely,

ECOLOGY AND ENVIRONMENT, INC.

Jeryl T. Kolb, CHMM  
Environmental Scientist
